My job as a graphic designer, is to make everything look beautiful, to be user friendly and make the impossible possible. I'm able to create whatever I want without limitations. I'm grateful for the new technology, and programs like Photoshop, Illustrator, Flash, Dreamweaver, etc. These software applications make my life easier. I love to push the creativity in different directions and always create something new.

## Personal Qualities:

- Creative
- Self-motivated
- Precise and fast
